Experience

Freelancing

Web developer

December 2024 – to Date

Working as a Freelancer for an open-source project that provides Journals for student and academicians currently using Deno js for its backend and react js for its frontend development.

 BSK Global Technologies

 Mid Java Software Developer

 February 2021 - November 30, 2024

Accomplishments and responsibilities

• Utilized technologies such as Postgres, Kafka, Docker, and Kubernetes to build and deploy scalable applications.

• Developed APIs using Rest Apis to provide flexible and efficient data access for clients.

• Designed and implemented microservices architecture using Spring Cloud, ensuring scalability and resilience.

• Integrated Redis caching to improve application performance and reduce database load.

• Implemented LDAP for user authentication and authorization for a client's Mobile loans disbursement management system.

• Utilized Spring Batch for batch processing of large data sets, improving data management efficiency.

• Implemented OpenFeign for building REST clients, improving the integration of microservices.

• Participated in the full software development lifecycle, including requirements gathering, design, development, testing, and deployment
